ENVIRONMENTAL ENGINEERING

RAPID RESPONSE TIMES
EXCEPTIONAL SERVICE
ADAPTIVE TO CHANGING NEEDS

WELCOME TO OUR ENVIRONMENTAL ENGINEERING DEPARTMENT

Carroll Engineering takes a vertical engineering approach for residential, retail, and commercial projects. We can begin your project at conception, assessing the site for environmental issues, surveying the area to determine the property lines and physical features, and planning the site's layout. We advocate at the local, state, and federal levels as necessary to gain the proper approvals and permitting, and we participate in public hearings to gain citizen support through education.

WHAT WE DO

- **Community and Non-community Water Systems**
- **Sanitary Sewer Collection Systems, Treatment Plants, and On-Lot Disposal**
- **Geological, Hydrogeological, Geotechnical and Soils**
- **Real Estate Due Diligence**
- **Site Investigation, Remedial Design, and Remedial Action Administration**

"Quality is a state of mind and our driving force here at Carroll Engineering Corporation is to continuously provide the best level of experience to all of our clients. We strive to exceed expectations, build long lasting relationships, and utilize our projects to better each of our surrounding communities. Our departments within the firm act as consultants to each other, thus integrating all our knowledge, skills, and experience to ensure the most practical, efficient, and sophisticated solutions to every challenge. We identify and address potential problems at the earliest planning stage, then employ our innovative design approach for preventing difficulties and bringing our clients' projects to their satisfying completion. Thank you for entrusting our team with your projects and communities. We sincerely look forward to seeing and sharing in your success for years to come."

~Allen B. Mason P.E., President
